Office Action Summary

Art Unit 1771

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1-21 are rejected under 35 U.S.C. § 112, first paragraph as based on a disclosure which is non-enabling, substantially for the reasons set forth in paragraph No. 2 of Paper No. 3, together with the following additional observations. The Examiner is essentially making an "undue breadth" rejection, and believes that the multiple criteria and related information set forth in the specification at page 7 line 20 - page 8 line 2 should have at least the broadest ranges set forth in the claim in order to properly define the metes and bounds of the invention. Applicants' remarks (Response, page 5, third complete paragraph) do not really contest this observation, except to apparently traverse the Examiner's position that such criteria should not be set forth in the claim; however, the Examiner believes his position is proper for reasons of record and as such the rejection is repeated.

3. Claims 1-21 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Kreckel et al. in view of Joseph et al., substantially for the reasons set forth in paragraph No. 4 of Paper No. 3, together with the following additional observations. Applicants' remarks with respect to both of the relied upon references for the combination, as well as those relating to Gehlsen et al., cited as evidence of the art appear for the most

Art Unit 1771

part to focus upon the references individually, and fail to appreciate the particular reference teachings

which the Examiner has relied upon for his combination rejection. For example, Kreckel et al. is not relied upon for teaching a fibrous reinforcing material, as the rejection clearly states, this element being supplied by the secondary reference Joseph et al. The Examiner also believes that applicants have failed to appreciate that Joseph et al. supplies the missing element of the relied upon prior combination, namely the fibrous materials and the Examiner further again notes that column 11 lines 4-13 ^{of Joseph et al} discloses a broad genus of non-woven webs that can be made from a variety of fibers which can include such fibers as reinforcing or elastic threads or strands that can be used in stretch release adhesive tape backings and the like so as to form a highly extensible foam material or backing where the elastic behavior of the web can be controlled to an appropriate level (paragraph No. 4 of the prior Office action³, page 3). Finally, with respect to Gehlsen et al., it is believed that this reference is not required to "teach a method that includes the step of forming fibers" and applicants' remaining arguments are not seen to overcome the relied upon prior art rejection of record.

4. THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time policy as set forth in 37 C.F.R.

Art Unit 1771

§ 1.136(a). The practice of automatically extending the shortened statutory period an additional month upon the filing of a timely first response to a final rejection has been discontinued by the Office. See 1021 TMOG 35.

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
